

Collaborative Program in

Knowledge Media Design

at the University of Toronto

- interdisciplinarity
- collaboration
- innovation
- creativity

Knowledge media design

KMD spans the study of the ways in which media and media technologies shape, and are shaped, by human activity. We design, build, use, evaluate, and critique the media and policies of our networked world. People and their practices are at the heart of all we do.

Collaborative program

Provides a specialization for graduate students (Master's or PhD level) from a variety of academic backgrounds interested in a human-centred approach to the design and use of new media in the context of the real world practices of individuals and communities.

Collaborating units

- Architecture, Landscape, and Design
- Computer Science
- Curriculum, Teaching and Learning OISE/UT
- History of Art/Visual Studies
- Information Studies
- Institute of Medical Science
- Mechanical and Industrial Engineering
- Sociology
